Gyasik Núñez

{ Web Developer }

I'm a web developer and musician with a heavy interest in technology, gaming, and music! My family is from Chile and I currently live and work in South Florida. I love front-end development and creating applications that are interactive and visually appealing. I'm a big supporter of music, animal welfare, and keeping our earth clean. When I'm not working or learning, I like to play guitar, go diving & hiking, and travel to new countries.

JavaScript · Node.js · MongoDB · Express · Angular2 · React · ES6 · HTML · CSS · Flexbox · SCSS · Git · Github · Firebase · Bootstrap · Ruby · Ruby On Rails · Photoshop · Sketch · Shopify · Liquid · Optimizely

PERSONAL PROJECTS

Portfolio (2018 – Present) ↗
- This is my personal portfolio website where I keep all of my past projects I've built regarding Web Development. It showcases full-stack JavaScript applications, static web pages, and anything related to programming exercises or projects.
- http://www.gyasiknunez.com/

Python JS - Snake Game Remake (02/2018) ↗
- This is a Canvas based JavaScript game that I created in one week for Module 1 of Ironhack. It is a remake of the classic game "Snake".
- Technologies: Vanilla JavaScript, Canvas, HTML, CSS, Heroku
